

# Physical Sustainability game

There are two main health risks for the hairdressing industry. One of these risks is working with chemicals. Write down the other main health risk on the answer sheet.

The second (just completed) health risk has a number of causes. Write down four causes on your answer sheet.

Work conference with students in Malaga, 4-8 October 2016

Should the game be:

1. specific to the Hair & Beauty sector
2. about sustainability in general
3. a combination of both  
???

Read the questions below and fill in the correct answer on the answer sheet.

1. **Fair-trade coffee is more expensive to purchase because:**

- A set minimum price is paid to the producer.
- The coffee is of the best quality.
- More profit is generated by the stores selling this product.

If it is a game specific to the Hair & Beauty sector, should it be:

1. a game per workstation and if so:  
which workstations?
2. a game per theme of sustainability and, if so,  
what are the themes?

3. If the game focuses on general subjects, what themes will play a role in the conversation (contact) between the customer and the employee in the salon during the (hair)treatment?

4. With how many groups of students will we play the game?
- 3,  
4,  
5,  
6?

5. Are we going to adopt the system and counting the scores of the existing game?

- ✓ 6. Will we use :
  - attributes
  - or only images?
